ABOUT ME

I'm a game programmer passionate about AI, gameplay and engine programming with a past experience of full-stack web programmer. I'm fluent both in C/C++ and Java, but also have some good knowledge of C#, python and web languages. Apart from Unreal Engine 4, I've already used Unity to make games, but also OpenGL, DirectX10 and more recently Vulkan.

EXPERIENCE

October 2018 – July 2019 | Quality and Security Full-Stack Developer at Boulanger S.A.
Internship while studying at the IMT Lille Douai.

April 2018 – June 2018 | International Internship at the NITSC University of Sendai, Japan
Validation Internship while studying at the IUT de Calais.

EDUCATION

2020 – 2021 | ISART Digital Montréal
AEC Game Programming.

2018 – 2019 | IMT Lille Douai
First year of Engineering School.

2016 – 2018 | IUT de Calais
French "DUT" Computer Science Diploma.

SCHOOL PROJECT

January 2021 - June 2021 | 3D Game Engine using Vulkan in C++.
Final Project at Isart Digital Montréal.

SKILLS

Software Programming (JAVA, C, C++, .NET, C#, Python)

Game Programming (Unreal, Unity, Vulkan, OpenGL)

Web Programming (HTML/CSS, JavaScript, PHP, JQuery)

Versionning (Git, Perforce et SVN)

Network

Databases (MySQL, PostgreSQL)

Project Management (AGILE, Scrum)

Fluent in English with a TOEIC score of 975.

INTERESTS

New technologies
Artificial Intelligences

Fantasy and futuristic literature
Video Games
